COMMENTS:

I support a new school on the site overall as this was always promised as part of the development.

I believe WBC should however reconsider returning the north part of the site to Taylor Wimpey as it will encourage more flats. Instead this should be seen as an opportunity to provide the much needed secondary school places. By building both primary & secondary in the same location, you reduce congestion as most parents currently have to drive their kids several miles over to the other side of Wokingham for secondary education.

I also have concerns over the lack of parking and sufficient drop off facilities, and the access onto Hyde End Lane will lead to further traffic congestion on that road.
