☒ No objection
☐ No objection subject to conditions (and reasons) **stated below**
☐ Request further information before determination as **stated below**
☐ Objection due to the reason(s) **stated below**

Comments On Proposal

General

Green Infrastructure has reviewed this full application for the removal and replacement of boundary fencing and gates associated with the University of Reading, Whiteknights Campus. In addition to replacement of fencing, areas of native hedgerow and infill shrub planting are also proposed in select locations.

This application has been reviewed against MDD policy CC03 which requires that any application will need to be demonstrate how it has considered the protection and enhancement of the Borough's green infrastructure network including, but not limited to, protection and retention of existing trees, hedges, and other landscape features, preventing and/ or mitigating habitat loss or fragmentation, and enhancing the green infrastructure network by incorporating high-quality soft landscaping.

The following submitted drawings and reports were reviewed with respect to this application:

- Planning Statement
- Design and Access Statement, 30303 NPA WK XX RP 1001, P02
- Site Location Plan, 30303 NPA WK ZZ DR L 3001

- Site Plan WBC Overview Sheet, 30303 NPA WK ZZ DR L 3010
- Site Plan WBC Sheets 1 through 7, 30303 NPA WK ZZ DR L 3011 through 3015
- Proposed Planting Schedule and Management Notes, 30303 NPA WK ZZ DR L 5001
- Typical Fence & Gate Details, 30303 NPA WK ZZ DR L 7000
- R1 of Tree Survey, Arboricultural Impact Assessment/ Method Statement, 28 April 2026

Green Infrastructure

1. Green Infrastructure has no objection to this application subject to the works being carried out in accordance with the Arboricultural Impact Assessment and Method Statement
2. With respect to the individual site plans that have been produced, it would be helpful if the G2 tree groups identified in the AIA were also noted on the individual site plans that were produced.

It is my understanding from the AIA that all works, where G2 trees are located, are to be carried out by hand under direct arboricultural supervision.'

I appreciate that there is a drawing note to this effect on the sheets, but further highlighting on the drawings might be beneficial.

Conditions & Reasons (if required)
