PLANNING POLICY/LEGISLATION

Town and Country Planning Act 1990 (as amended)

Section 55	Provides that 'development' includes the carrying out of building operations on land, and 'building operations' includes structural alterations or additions to buildings.
Section 57	Planning permission is needed for all development of land.
Section 187a	Enforcement for breach of conditions

The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended)

Section 7	Prior approval applications: time periods for decision
Article 3	In conjunction with Schedule 2, Part 14 Class J grants planning permission for installation or alteration etc of solar equipment on non-domestic premises

Article 4	Provides that the planning authority may give direction to restrict the effect of Article 3
-----------	---

PLANNING HISTORY

Application No.	Description	Decision & Date
231077	Full application for the proposed change of use of existing office building to a Place of Worship and community centre.	Approved: August 2023
40073	Change colour of metal elements around main entrance to match white windows	Approved: January 1993
34046	Demolition of existing buildings and erection of new (B1) building of 1950 sqm plus plant room and provision of 78 parking spaces	Approved: April 1990

PART J.1.2.3 APPRAISAL

Town and Country Planning Act 1990 (as amended)			Yes	No
1	s.55	Does it constitute development?	✓	
2	s.191	Would it be contrary to an enforcement notice?		✓
3	s.187a Art.3 (4)	Would it be contrary to any condition imposed by any planning permission granted or deemed to be granted?		✓
The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended)			Yes	No
4	Art.3 (5)	Are the building operations involved in the construction of the original building lawful?	✓	
5	Art.4	Is there an 'Article 4 Direction' in effect for the site?		✓
6	Sch.2 Pt. 14	Does it consist of the installation, alteration or replacement of— (a) microgeneration solar thermal equipment on a building; (b) microgeneration solar PV equipment on a building; or (c) other solar PV equipment on the roof of a building	✓	

PART J.1.2.3 APPRAISAL

7	J.1(a)	Would the solar PV equipment or solar thermal equipment be installed on a pitched roof and would protrude more than 0.2 metres beyond the plane of the roof slope when measured from the perpendicular with the external surface of the roof slope?		✓
8	J.1(b)	Would the solar PV equipment or solar thermal equipment be installed on a flat roof, where the highest part of the solar PV equipment would be higher than 1 metre above the highest part of the roof (excluding any chimney)?		✓
9	J.1(c)	Would the solar PV equipment or solar thermal equipment be installed within 1 metre of the external edge of that roof?		✓
10	J.1(d)	In the case of a building on article 2(3) land, would the solar PV equipment or solar thermal equipment would be installed on a roof slope which fronts a highway?		✓
11	J.1(e)	Would the solar PV equipment or solar thermal equipment be installed on a site designated as a scheduled monument?		✓
12	J.1(f)	Would the solar PV equipment or solar thermal equipment be installed on a listed building or on a building within the curtilage of a listed building?		✓
13	J.2(a)	Would the solar PV equipment or solar thermal equipment be installed on a wall and protrude more than 0.2 metres beyond the plane of the wall when measured from the perpendicular with the external surface of the wall?		✓
14	J.2(b)	Would the solar PV equipment or solar thermal equipment be installed on a wall and be within 1 metre of a junction of that wall with another wall or with the roof of the building?		✓
15	J.2(c)	In the case of a building on article 2(3) land, would the solar PV equipment or solar thermal equipment be installed on a wall which fronts a highway?		✓

PART J.4 APPRAISAL

Development under Class J is permitted subject to the developer applying to the local planning authority for a determination as to whether the prior approval of the authority will be required as to:

The design or external appearance of the development

The proposal is for the installation of solar photovoltaic panels on a large building adjacent to Reading Road, Winnersh, granted under consent 34046. The building is positioned within a cluster of development associated with the commercial and industrial uses of the land in this section of Reading Road. The panels would be installed on all the roof panes, excluding the principal elevation.

Given that the building is an early 1990s purpose-built office block, with no particular architectural merit, it is considered that it only offers a neutral contribution to the character of the area. Any views of the solar panels would be restricted from immediate view on Reading Road, due to the considerable height of the building and the position of the solar panels.

In line with the conditions of Class J, it is considered that the proposal would not have a cramped appearance, while the minimal protrusion and colour of the panels would not detract from the appearance of the host building, which as stated, is not of any particular architectural merit. Therefore, the proposal would result in harm to the character of the area or to the appearance of the host building.

The impact of glare on occupiers of neighbouring land

Whilst the application site is surrounded by development, it should be noted that there is significant separation from the neighbouring buildings. To the southeast, there is a separation of approximately 12.5 metres from the nearest building, approximately 17 metres to the south and approximately 15 metres to the northwest. Further consideration is also given to the height of the building and the shallow pitch of the roof, which would further mitigate any potential glare for neighbouring land.

As such, the proposed solar panels would not result in an adverse glare impact upon neighbouring occupiers.

And the provisions of paragraph J.4 (prior approval process)

The application must be accompanied by-

- (a) a written description of the proposed development;*
- (b) a plan indicating the site and showing the proposed development;*
- (c) the developers contact address; and,*
- (d) the developer's email address if the developer is content to receive communications electronically;*

Together with and fee required to be paid.

A written description as contained in the application form and supporting statement along with the relevant plans, fee and contact details.

The local planning authority may refuse an application where, in the opinion of the authority—

- (a) the proposed development does not comply with, or*
- (b) the developer has provided insufficient information to enable the authority to establish whether the proposed development complies with the conditions, limitations or restrictions applicable to the development in question.*

There is no reason to conclude that the proposal would not comply with the relevant conditions, limitations and restrictions under Part 14 (Class J).

The local planning authority must give notice of the proposed development by site display in at least one place on or near the land to which the application relates for not less than 21 days of a notice which describes the proposed development; provides the address of the proposed development; specifies the date by which representations are to be received by the local planning authority; or by serving a notice in that form on any adjoining owner or occupier.

Letters were sent to neighbouring properties on 13 May 2020. No written representations being received.

The local planning authority may require the developer to submit such information as the authority may reasonably require in order to determine the application, which may include assessments of impacts or risks, statements setting out how impacts or risks are to be mitigated; or details of proposed building or other operations.

No further information is required.

The local planning authority must, when determining an application, take into account any representations made to them as a result of any consultation under sub-paragraphs (5) or (6) and any notice given under sub-paragraph (8); b) have regard to the National Planning Policy Framework issued by the Ministry of Housing, Communities and Local Government in February 2019, so far as relevant to the subject matter of the prior approval, as if the application were a planning application; and in relation to the contamination risks on the site, determine whether, as a result of the proposed change of use, taking into account any proposed mitigation, the site will be contaminated land as described in Part 2A of the Environmental Protection Act 1990, and in doing so have regard to the Contaminated Land Statutory Guidance issued by the Secretary of State for the Environment, Food and Rural Affairs in April 2012⁵⁶, and if they determine that the site will be contaminated land, refuse to give prior approval.

Not applicable.

The Public Sector Equality Duty (Equality Act 2010):

In determining this application the Council is required to have due regard to its obligations under the Equality Act 2010. The key equalities protected characteristics include age, disability, gender, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief. There is no indication or evidence (including from consultation on the application) that persons with protected characteristics as identified by the Act have or will have different needs, experiences, issues and priorities in relation to this particular planning application and there would be no significant adverse impacts as a result of the development.

RECOMMENDATION

Conditions agreed:	Not required
Recommendation:	Prior Approval Not Required
