

Community Involvement Note

Estate Management Western Car Park and Storage Building Application

***"Construction of an ancillary single storey covered open fronted parking and storage structure,
for use as part of the Estate Management Building complex and associated landscaping."***

At the Strowdes Estate, Culham Lane, Remenham, RG10 8NU

This application is a minor scale application covering a storage building at the Strowdes Estate.

The application is submitted concurrently with a Section 73 amendment application, which principally covers the re-siting of the previously approved main central estate management building and adjacent eastern car port building 12m to the west.

Together, the two applications will facilitate a minor re-siting and reconfiguration of the approved complex.

On this basis, there has been no formal community involvement to support this proposal. However, updates on the initial elements of construction in relation to the Estate's Main House have been provided to neighbours.
