

Evening ,

I live in 124 nightingale road , Woodley. Our property is under threat of grey squirrel entering to our kitchen & first floor rooms and destroying stuff and chewing lot of stuff & food grain , Main reason is there is a big chestnut tree of the neighbour 126 nightingale road ,less than 1 meter of our building in back garden . There is an infestation of squirrel lots of them , they come through the overhanging branches of this gigantic tree , which is , several branches in thick are all over my house , it's a treat to live in a house , where this tree branches fall over the roof ,Squirrel problems, Bits & debris destroying my roof & gutter is all the time stuck , we can't handle this by living here safely .this tree is a TPO , tree . I want council to come and look and make a decision to trim some of its branches , which is taking over our property, & squirrels are finding easier to come towards our kitchen . Please see a pic attached . What i talking about .
