Dear Reading Football Club Ltd,

The safety of our customers and colleagues is our highest priority. To ensure the continued safe operation of your LPG installation, there are guidelines set out in Liquid Gas UK Code of Practice that we must adhere to.

During a recent delivery to your LPG storage vessel, our driver raised a concern that we'd like to bring to your attention.

It was noted that the area around the LPG installation contained trees and overhanging branches. The area surrounding the vessel needs to be kept clear from a source of ignition - including cars and other vehicles, as well as trees, weeds, long grass, foliage, and combustible materials.

You can check the distance for your tank and suitable types of screening or fencing that can be used on our website at www.flogas.co.uk/safety/bulk-tanks.

What you need to do

If this issue hasn't yet been addressed, please resolve it as soon as you're able to safely do so. To confirm that the criteria are being met, or you'd like further assistance from us on what needs to be done, please complete our quick online form by **scanning the QR code below** with the camera on your smart device (or go to flogas.co.uk/tank-issues).
