COMMENTS:

Considering the planned height of the proposed building, it will affect the view from my garden patio. The site of the trees to the east and the open sky would be restricted. The proposed building traverses across the complete plot making the local area overpopulated by building therefore adversely affecting balance between buildings and gardens. This proposal will surely affect the resale value of adjacent buildings.

I, therefore, suggest the application be rejected or at the very least be revised to a smaller and certainly reduced height house.
