

TPO Application Information

Site Address: Trees at Keephatch Wood, rear of 14 Dyer Road, Wokingham, Berkshire
RG40 5PG

Applicant: Harvinder Sembi

Mob: [REDACTED]

SITE PLAN:

PROPOSED TREE WORKS:

T001 Oak – Suppressed sapling. Fell to ground level

Reason for works: T001 is a slender young sapling with a swept lower trunk and asymmetrical crown west towards the garden of 14 Dyer Road. The tree has no wider visual amenity value from a public viewpoint. The form of the tree is overly slender due to suppression from adjacent trees. The proposed works will remove a potential nuisance tree with no impact on the wider visual amenity of Keephatch Wood.

G001 Oak – Multi-stem, asymmetrical young tree group. Reduce lateral branches on west side of crown by 1-1.5m back to boundary of 14 Dyer Road. Cuts will be graded to leave a natural – looking canopy shape and cuts will not exceed 40mm diameter.

Reason for works: Small trees with significant future growth potential. Owner of 14 Dyer Road wishes to prune the trees in order to manage their lateral spread in relation to 14 Dyer Road. The proposed works are very minor pruning works and the health and wider visual amenity of the tree group will not be affected in any way.

PHOTOS:

Photo 1 – T001 (Oak) – Young, suppressed tree with swept stem and asymmetrical crown. Fell to ground level

Photo 2 – Swept stem of T001 (Oak) – Young, suppressed tree with swept stem and asymmetrical crown. Fell to ground level

Photo 3 – G001 (Oak) – Young Oak group with low, asymmetrical canopies towards 14 Dyer Road. Reduce lateral branches on west side of crown by 1-1.5m back to boundary of 14 Dyer Road. Cuts will be made to leave a natural – looking canopy shape and cuts will not exceed 40mm diameter.
