COMMENTS:

It's irresponsible to continue to build in Shinfield when the available infrastructures are already failing. Getting out of the neighborhood takes 15-20 min in the morning, as the roads already can't cope. Mobile phone signal is virtually non existent: stepping out of one's home WiFi signal is strong into communication darkness. Often it's impossible to receive or make mobile calls even from home. The local school is way over subscribed: they're rejecting pupils living just 0.4m away, well within the Shinfield meadow development. Unless all infrastructures are updated BEFORE any further development is allowed, you're looking at the total collapse of an entire community.
