COMMENTS:

We object this proposal. There are too many houses in this estate which has already caused lots of anti-social behaviours and problems. This will increase flood risks to existing properties and surrounding area. Also this will dramatically increase light and noise pollution to the existing properties on Hyde End Road. In addition the current infrastructure including roads, schools, GPs, dentists, already overwhelmed, are the new development will cause even further problems. This purely profit-driven development will bring enormous social and service issues to this area.
