COMMENTS:

My main objection is to do with the environment if this extension were to go ahead. The property itself, the communal car park next to the property and the road is already congested with vehicles, owned by Mr Squire. This would lead to even more congestion and noise pollution with builders vehicles and skips etc. and naturally they would end up parking along the road, which would block access to emergency vehicles and people's driveways. I already see people finding it difficult getting off their driveways because their view is obscured or cars are parked inconsiderately and cars have to swing out coming round the corner into the oncoming road to get round the parked cars, at times.
