COMMENTS:

This land is already a 'natural greenspace'. There is no need to disrupt this well-established natural environment and eco-system with a man-made SANG. There is a footpath which can be easily accessed from both Arborfield Village and Arborfield Green which leads to beautiful and natural countryside which can be enjoyed by all. This area has already been interfered with by creating the Arborfield relief road, further changes would inflict further unnecessary harm to this habitat. The potential to build houses is very worrying as infrastructure and services are already overstretched by other housing in Arborfield Green.
