

Document: Noise Attenuation Strategy

Version: 1.0

Owner: Peter Rhodes

Site Details & System Overview

This statement outlines the noise attenuation strategy for the brewery located at Unit 11 Anglo Industrial Park, Fishponds Road, Wokingham, RG41 2AN. To manage noise that might cause potential disturbances to the surrounding neighbours, limiting factors have been put in place.

Brewery Plant & Equipment

- **Equipment Siting:** The core of the brewery, the brew kettle, has been positioned to a furthest point inside the unit. The cold store external conditioning unit has been positioned on the external wall not facing any residential.
- **Brewing Operating Hours:** Brewing and associated activities take place between the hours of 9pm-5pm.

4. Outdoor Areas

- **Beer Terrace:** Outside taproom seating hours to reduce evening noise are limited to 21:30.

5. Taproom Operational Management

- **Dispersal Strategy:** Music is switched off 15 mins before customer exiting time to encourage a calmer and quieter exit.
- **Signage:** Highly visible notices are displayed at the exit door to politely requesting that patrons leave quickly and quietly to respect local neighbours. Staff should monitor and manage large groups congregating on the pavement.
