COMMENTS:

Having read the concerns already expressed by local residents I wish to add my additional concerns as a resident of Swallowfield.

1. The requirement for provision of a safe water supply to the site to meet public health standards.
2. For the site to meet proper sewage disposal standards, again to meet public health standards.
3. Arrangements for the collection and disposal of domestic waste.
4. Clear arrangements for who has access to the site, particularly for living in the gypsy and traveller pitches.
5. Arrangements for routine monitoring of the site for environmental protection and general management.
