COMMENTS:

Crossing this road is dangerous at the best of times. The large lorries (1 or 2 each day) often cause near-accidents. If the traffic (including 20+) articulated lorries is set to increase it is only a matter of time before someone dies. The pathway is incredibly thin and many children have to cycle - jumping off and on the curb as the road is dangerous with just cars and occasional larger vehicles.

Flooding increasing .

Danger for wildlife.

Quite possibly the most idiotic planning decision in my years.

Mike
