COMMENTS:

Looking at the proposed plan, it is clear that part of the side wall will be attached to boundry with 61 Ravensbourne Drive plot, as we do share now part of the fence. Since laying foundations will require excavating some ground on our side, how the applicant is planning to do it without crossing to our side? Or without damaging the existing fence? The solution could be to alter proposed extension so the excavation and building work do not affect 61 Ravensbourne Drive plot. I have not been cotacted about the proposed extension even though we do share some boundry.
