COMMENTS:

I am writing to object about this application. The nature of the business and the storing of such a volume of fuels is wholly unsuitable in this location which is right next to a beautiful nature reserve which is prone to flooding. This will put the nature reserve in constant danger of pollution and the measures proposed to prevent this from happening are not anywhere near good enough. The entrance to the location is situated on the Old Bath Road (A3032) which has sharp bends and totally unsuitable for the proposed extra traffic and type of vehicles that will be used to deliver the fuels. Photos exist of the vehicles that were used before the business was forced to stop the operation and seek planning permission which clearly show them blocking traffic in order to manoeuvre in and out of the location. They were a clear visual block and dangerous to traffic clearing the sharp bends in that road.
