

PLANNING REF : 250733

The latest updates from the developers contain changes to the SANG, and rights of way, but nothing of note to address the traffic chaos that another junction on the Eversley Road roundabout would bring to an area already very busy on an average day. I also echo other comments that state that there are little in terms of local amenities currently in place, and this plan does not help in any way.

A SANG is not something that we need, especially in lieu of more housing development. We are lucky to already have an abundance of outdoor spaces. Also, an active travel route is all very nice, but for many people, myself included, using a bicycle to commute isn't an option.
