COMMENTS:

Are you having a laugh? The roads cannot cope round here as it is without adding nearly 200 more households. Doctors and dentist appointments are impossible to secure, there simply is not the infrastructure to support all these extra people. You are already planning to build 4500 houses round the corner. Why are you trying to build these as well, in the process harming the wildlife on and near this site. I really wish Wokingham Borough council would try to remember the geographic area in their remit because then perhaps they could consider building in the north of the borough rather than dumping everything in the south but I guess that's cos that's where all the money is and they put a stop to it. Or is it simply that the university doesn't have as much land it wants to flog in the north? STOP, PUT THIS SOMEWHERE ELSE.
