COMMENTS:

We object this proposal for various reasons.

1. Healthcare issues: We already overwhelmed with delays in appointments for NHS and Dental. No provisions for us to improve this situation. It gets worse worse and worse to fully broken health services in Shinfield.

2. Academic issue: Current educational provisions in place are not fulling the existing demands and you would like to add more and more children to come this place and who will be missing their right to meaningful educational demands.

3. Traffic management: 200 more houses meaning 200 more cars - Do you think our Shinfield roads can manage this volume? We already facing traffic congestion during the peak time. More traffic will bring more chaos to local area.

4. Environmental impact: We dont want to inhale the toxic wastes come from these building constructions. We dont want to expose our children to the industrial dust.

5. Anti Social behavior issue: We as a community already struggling with this issue! More construction and more people will make it worse and ultimately Shinfield becoming less habitual place.
