Earth - Grip Product Details

Earth - Grip	
Name	Earth
Range	Edge
Effect	Concrete
Finish	Grip
Sizes	600 x 1200 x 20mm, 800 x 800 x 20mm, 600 x 600 x 20mm
Thickness	20mm
Slip Rating	R11 (Good)
Variation	V2 (Slight Variation)
Rectified	Yes
Colour	Tan
ID	42551
For information regarding adhesives, grout, cleaning and maintenance and for our Installation Guide please see the Customer Support pages at www.porcelain-tiles.co.uk/support/	

Manufacturer's Technical Specification

Manufacturer's Technical Specification			
Specification	Test	Required value	Result
Length and Width	ISO 10545-2	± 0.3% Max	Conforms
Thickness	ISO 10545-2	± 5% Max	Conforms
Linearity	ISO 10545-2	± 0.3% Max	Conforms
Wedging	ISO 10545-2	± 0.3% Max	Conforms
Warpage	ISO 10545-2	± 0.4% Max	Conforms
Water Absorption	ISO 10545-3	≤ 0.5 %	≤ 0.1%
Deep Abrasion Resistance	ISO 10545-6	≤ 175 Mm ³	< 150 Mm ³
Coefficient of Linear Thermal Expansion	ISO 10545-8	-	$6,6 \times 10^{-6} \text{ }^{\circ}\text{C}^{-1}$
Resistance to Thermal Shocks	ISO 10545-9	Testing Method Available	Resistant
Frost Resistance	ISO 10545-12	Must not produce noticeable alteration to surface	Conforms
Chemical Resistance	ISO 10545-13	Testing Method Available	A LA HA
Stain Resistance	ISO 10545-14	Testing Method Available	5

Manufacturer's Environmental Certification

Manufacturers Environmental Certification

Porcelain surfaces are made with a low environmental impact in accordance with BREEAM guidelines. BREEAM has become a benchmark for sustainable building practices in the UK and Europe. This is achieved through reducing any waste of non-renewable resources and using natural raw materials commonly found in the environment, as well as recycled materials where possible.

LEED® certification provides independent, third party verification that a building project meets the highest green building and performance measure. All certified projects receive a LEED® plaque, which is nationally recognised symbol demonstrating that a building is environmentally responsible, profitable and a healthy place to live and work. The environmental characteristics have been evaluated and found according to the requirements of content of recycled material for environmental assessment according to LEED® criteria. These products contribute to the increase in the LEED® rating of buildings where they are used.

The EU Ecolabel helps you identify products and services that have a reduced environmental impact throughout their life cycle, from the extraction of raw material through to production, use and disposal. Recognised throughout Europe, EU Ecolabel is a voluntary label promoting environmental excellence which can be trusted. Ecolabel certification applies to building products such as ceramic tiles for residential and public flooring and wall-covering. The commission in charge of the certification system measures the environmental impact caused by the entire productive cycle; in the case of ceramic tiles, the verification starts from raw material quarrying through to manufacturing, distribution, installation and their final disposal. Our factories conform and are certified by the European Community standard Ecolabel and the production process is in complete harmony with the Ecolabel certification.

GREENGUARD Certification ensures that a product meets stringent standards for minimal emissions of volatile organic compounds (VOCs) into indoor air. This program provides assurance that products designed for indoor use adhere to strict chemical emissions limits, fostering the creation of healthier interiors. Manufacturers with GREENGUARD Certification gain credibility for their sustainability claims, supported by empirical technical data from an unbiased third-party organisation. The GREENGUARD Certification Program instills confidence by ensuring that indoor products meet strict chemical emissions limits, contributing to the creation of healthier interior spaces. This empowers manufacturers to produce and customers to identify products with low chemical emissions, thereby supporting air quality and environmental well-being.

NSF® has facilitated the development of more than 75 standards and protocols for sanitary food equipment, and has certified thousands of products as safe to use in restaurant and commercial kitchen settings. NSF® food equipment standards include requirements for material safety, design, construction and product performance. The products conform to the requirements of NSF/ANSI Standard 51 – Food Equipment Materials. NSF/ANSI 51 establishes minimum public health and sanitation requirements for materials and finishes used in the manufacture of commercial foodservice equipment.
