COMMENTS:

When this site was originally proposed I objected due to the likely increase in hgv traffic and associated noise of vehicles coming at all times of the day. All though disappointed the development was given the go ahead, I took solioist in the fact that a restriction on delivery times was point in place to protect the local community from noise at unsociable hours. To grant the removal of this condition will have a negative impact on the health and wellbeing, not only of those leaving next to the units, but also those living next to the main arterial routes to the site. This in my view is unacceptable.
