COMMENTS:

I understand the proposed running track will 400m in length (I hope it is), it would be useful to have it marked at least every 100m (like the path at Palmer park) to make it practical for a all runners/ walkers from those doing 'couch to 5k or those wanting a sprint session.

Can I request the 'fitness Zone' be 'functional' with rig, somewhere to do pull ups, dip and parallel bars, wall ball target and maybe even adult sized monkey bars. Something that'll be useful for current (10+ years) fitness trends and not the nonsense machines that are seen at a lot of parks that are used for nothing other than expensive seats for teenagers!

On a more general note If this is to go ahead, please consider the residents of Millworth

Lane who have to put up with parking outside their drives and even

parking on drives already! PLEASE put double yellow lines in the lane, if not all the way, at least opposite our driveways to enable us to get in to our own properties. My grandparents had to pay to have the lane made up some years ago which

seems to have been forgotten! and ambulances have difficulty accessing properties when there is an emergency. Also, could a traffic calming measure be put in place to make the lane safer.
